

Skyline Cedar — Shou Sugi Ban Black

Skyline Collection

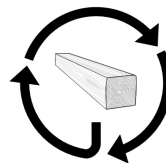

Product Information

The time-honored Japanese practice of charring Cedar produces a deep black color and crackled texture that naturally sheds water and repels pests. We apply the sculpting forces of flame to effect differing degrees of char on the wood's surface. Shou Sugi Ban Black comes sealed for both interior and exterior use.

Source

Reclaimed from NYC rooftop water towers, landmarks of the iconic NYC skyline.

Impact

Historic material re-use and local manufacturing support a circular economy and reduces a building project's carbon footprint.
