

# Black Locust — Coastline

## Watershed Collection

## Product Information

Black Locust offers the density and weather resistance of tropical hardwoods in a material that is harvested both sustainably and locally. Our Coastline finish provides an extra seal of durability while also offering a preview of the natural patina that the wood earns with time.

## Source

Harvested from Northeast forests in coordination with sustainable management plans that support long-term forest health & biodiversity.

## Impact

Black Locust from regenerative forestry practices in regional working forests is a sustainable local alternative to tropical hardwoods.
